monthly bibliography of medical reviews

NATIONAL LIBRARY OF MEDICINE PUBLICATIONS

NLM's publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. (Please do not send orders to the National Library of Medicine.) Remittance should accompany orders and, unless otherwise specified, foreign orders should include an additional 25% of the domestic price to cover mailing. To avoid delays, send a separate order for each title requested, and include full title, price, and GPO catalog number.

Index Medicus: Published monthly as a bibliographic listing of references to current articles from approximately 2,250 of the world's biomedical journals. Included are subject and author sections and a separate Bibliography of Medical Reviews. *Medical Subject Headings* is included as Part 2 of the January issue. Annual subscription: $155.00 ($193.75 foreign); single issues $12.05.
HE 20.3612:

Cumulated Index Medicus, 1973, Volume 14: A cumulation in eight volumes of the approximately 221,000 citations appearing in *Index Medicus in 1973*. Included are author and subject sections, Medical Subject Headings, List of Journals Indexed, and Bibliography of Medical Reviews. Price: $155.50 ($194.40 foreign).
HE 20.3612/3:14

Abridged Index Medicus: A monthly bibliography, based on articles from 100 English-language journals, designed for the individual practitioner and libraries of small hospitals and clinics. Annual subscription: $21.90 ($27.40 foreign); single issues $1.90.
HE 20.3612/2:

Cumulated Abridged Index Medicus, 1973, Volume 4: A cumulation in one volume of the citations appearing in the monthly *Abridged Index Medicus* in 1973. Contains subject and author sections. Price: $19.80 ($24.75 foreign). [1970 and 1971; $10.00 ($12.50 foreign); 1972—$12.20 ($15.25 foreign).]
HE 20.3612/2-2:

Medical Subject Headings: Published as Part 2 of the January *Index Medicus*. The approximately 8,500 subject headings in the 1974 *MeSH* are arranged alphabetically, with cross references, and in categorized lists. (Included with subscription to *Index Medicus*, also available separately for $7.95 ($9.95 foreign).

INTRODUCTION

In 1948 at a Royal Society Scientific Information Conference, J. D. Bernal reported on a preliminary analysis of a study on the use of scientific literature. The object of the questionnaire was to find out directly from working scientists what they had read, why they had read it, and what use they had made of the information. In his report, Bernal stated that an overwhelming proportion of scientists read and appreciated reviews and that reviews formed a very important and increasing part of general background reading.

The reading habits of medical investigators, clinicians, and educators, and of workers in fields allied to medicine amply confirm today the observations of Bernal twenty-five years ago. Indeed, as biomedical literature expands, the need for reviews appears more obvious.

Through the *Monthly Bibliography of Medical Reviews*, the Library hopes to provide health professionals with an easily accessible desk reference tool for guidance to the latest reviews in the journal literature of biomedicine.

Medical reviews are defined by the Library as articles which are well-documented surveys of the recent biomedical journal literature. In most cases the articles include a list of references either in the body of the paper or as a bibliography. Articles which include case reports are considered reviews only when the case reports serves to document the subject of the review.

Articles with the following characteristics are not considered as reviews in this bibliography: case reports or original research articles containing a review of the literature as an adjunct; statistical and epidemiological surveys; historical reviews; bibliographies which comprise only a listing of references; monthly summaries of subject areas which appear as a regular feature in journals; theses; and lengthy articles covering many aspects of a specific subject which are more appropriately considered as refresher courses rather than reviews.

SUBJECT HEADINGS

Users of *Monthly Bibliography of Medical Reviews* will find an acquaintance with *Medical Subject Headings* (*MeSH*) useful in determining which subject headings are most appropriate for their needs. *MeSH*, the National Library of Medicine's authority list, is the technical language which provides controlled subject access to the biomedical literature indexed for MEDLARS. *MeSH* is published as Part 2 of the January *Index Medicus* (see list of publications, inside front cover).

Although the most specific terms available in *MeSH* are used in indexing articles for *Index Medicus*, broader headings are used for reviews to enable grouping of similar material.

bibliography of medical reviews

Subject Section

Medical Reviews are defined by NLM, for inclusion in the Bibliography of Medical Reviews, as articles which are well documented surveys of the recent biomedical literature.

Not included are: reviews of the literature which document case reports or original research; statistical and epidemiological surveys; historical reviews; bibliographies which comprise only a listing of references; monthly summaries of subject areas which appear as a regular feature in journals; theses; and lengthy articles covering many aspects of a specific subject which are more appropriately considered as refresher courses rather than reviews.

Although the most specific terms available in MeSH are used in indexing articles for Index Medicus, broader headings are applied for reviews to enable grouping of similar material.

ABDOMEN (A1)

[Calcification observed in plain x-ray of the abdomen and its interpretation. 5] Okuda K, et al.
Jap J Clin Radiol 19:1-8, Jan 74 (22 ref.) (Jap)

ABDOMEN, ACUTE (C17)

Medical conditions mimicking the acute surgical abdomen. Steinheber FU.

ABNORMALITIES, MULTIPLE (C16)

[Wilms' tumor and congenital malformations] De Andres Bassuri L, et al.
Rev Clin Esp 130:373-8, 15 Sep 73 (31 ref.) (Spa)

ABORTION, MISSED (C6)

Angiography of selected pathologic pregnancies. Altemus R.
Radiol Clin North Am 12:59-77, Apr 74 (45 ref.)

ACETYLCHOLINE (D5)

[Neurochemical basis for pathological motor activity] Hole K.
Tidsskr Nor Laegeforen 94:11-7, 10 Jan 74 (Nor)

ACHIEVEMENT (F1)

Assessment of short-term visual memory and its educational implications. Carroll JL.
Percept Mot Skills 37:383-8, Oct 73 (19 ref.)

ACID-BASE EQUILIBRIUM (G1, H)

Acid-base monitoring. Rattenborg CC.
Clin Anesth 9:139-70, 1973 (32 ref.)
Effects of lysine on ammonia formation, hydrogen ion, and pot assium ion balance: a review and an hypothesis. Zweig JI.
Clin Chem 19:943-9, Sep 73 (53 ref.)

ACNE (C12)

An overview of acne. Kligman AM.
J Invest Dermatol 62:268-87, Mar 74 (85 ref.)
Sebaceous glands and acne vulgaris: unsolved problems. Pinkus H.
J Invest Dermatol 62:336-9, Mar 74 (16 ref.)
